My dear Feza,

11/12/61

It is 6-30 pm. I have been to 2 parties  
— one Farewell Maths, one farewell Christmas  
Physics. I attended both before my students  
(some from Pakistan) came up so that I could down  
some champagne & sherry before feeling &  
questioning eyes came. What ~~a~~ delightful letter  
you write. I am keeping all yours and hope to  
edit an edition after your passing away. At least  
the Turkish edition will keep me in bread and  
baked beans for the rest of my natural  
period.

1st — regarding the charge of my  
being caught sleeping with my friends' wives!  
Allah Allah! As a good Muslim I draw  
my friends into 2 classes; One the class  
whose wives I never even look at  
with any but the most  
sisterly eye;

you go to the Tripe Shop in Central Island. I. those days! when both of us were younger & even tripe could be digested.

two ~~that~~ otherwise. Now in the latter category there are none I know of. I swear to you that I am not a perpetrator of the crime of ~~not~~ holding the Atomic Energy Agency Seminar. In fact I opposed it: it deflects people from the Institute idea which I like. ~~So now~~ but they hold it in 2 shifts against my advice, Shift 1: 15th July - for 3 weeks + shift 2 4th August for 3 weeks. You should ignore these people. The names you mention are certain to gain you immortality as the holder of Seminars. Also after holding the Seminar once you will for an eternity be cured of all visitors. This may young & let me <sup>very</sup> humbly say to you in experienced friend, is the fate of all physicists like ourselves who have a very precise intention of building up schools. All I fear is that you will be so cured of your friends that you won't want to see me when I wish to come &
