Professor F. Gürsey
c/o Department of Physics
CERN
Geneva 23, Switzerland

Dear Professor Gürsey:

I wonder whether you are likely to be making a visit to the United States some time soon. I understand from Professor Sinanoğlu that you are on leave this year from your regular position at Ankara and that a trip to the United States is not out of the question. If you are contemplating coming to this country, it would be very nice if you could come to Yale and ~~to~~ give us a talk here.

Your record and accomplishments have produced a considerable impression in our department. Professor Hughes, our Chairman, and others have many things they would like to talk with you, both in physics and otherwise.

Sincerely yours,

G. Breit
