

Zollikon 29. I. 62.

Dear Dr. Girsay, Coming home from a Christmas vacation, I spent with Italian physicist friends in Florence, I found your card with your good wishes. I thank you both! My thoughts too went towards you during the holiday time, wondering where you are. I was very glad indeed to get some news of you, knowing you all in good health, at work and busy at school, - it will need a lot of adaptation for the child.

I too hope you will come and visit us, now that you are nearer. I'm so sorry I missed you, when you were at Geneva. Have you seen the "Salle Pauli" at Cern's? I gave them Pauli's

whole library and his valuable "Separata - Sammlung" among other things. Everything is beautifully taken care of, and catalogued. Cern is willing to send out microfiches of all things catalogued, in case you need something.

I am still working on Pauli's affairs, the Later-Collection makes great progress. Also I hope Pauli's "Collected Works" may come out this year. Prof. Weisskopf + Kronig are the Editors.

Will you keep me informed of your plans, maybe we could meet half-way somewhere; I'm often going to Italy.

With my very best wishes for the year that has begun for all of you and warmest regards, yours
Franco Pauli
